Turandot

Kroma Atelier Turandot -- a tall, gorgeous and impressive looking 460lbs krion beauty – reproduces music with all the emotion, strength and refinement that artists intend to express. And no, that’s not a cliché.

Following Kroma’s tradition of naming their speakers after Opera heroines, Turandot comes from Puccini’s protagonist, the beautiful and strong daughter of a Persian Emperor. She is capable to command that “Nessun dorma!” and to understand the true nature of love.
